Did You Know?

No matter how hard you try to listen, you can't hear anything in space. That's because in space, there is no sound at all. Sound is carried in the form of a compression wave, which means it has to travel "through" matter - liquid, solid, or air. As the people of the Lord, we are like sheep and must differentiate between the Shepherd's voice and the enemies' voices which come to deceive and to lead people astray. We must be careful with what is conveyed even in the magazines and books that we come across which contradict the precepts of God. Thankfully, we can hear God in many ways as we learn to hear and recognize His voice.

Act: God can speak to others through you. Surprise someone with a random act of kindness to speak God's love to them.

Think:

We can hear God by reading His Word. What are some other ways we can hear His voice?
